

eBATCH RM

THE MOST ACCURATE, RELIABLE AND FASTEST
READY-MIX CONCRETE BATCHING AUTOMATION.

Core system of an entire suite of intuitive and fully integrated products lines ranging from a mix design management tool to a pre-invoicing interface and including an effective product quality control process through consistency measurement.

Configurable to manage:

- ◆ 16 scales for:
 - ◆ Aggregates
 - ◆ Additives
 - ◆ Waters
 - ◆ Fibres
 - ◆ Dyes
 - ◆ Fillers
 - ◆ Ice
- ◆ Production with Mixer
- ◆ Dry production
- ◆ 16 Precharges
- ◆ Bypass
- ◆ Skip

General Architecture

- ◆ Integration management with software
- ◆ Backup through scheduled procedures
- ◆ Centrally managed automatic updates of the plant software
- ◆ Multi-plant management through **Rt-Sync**
- ◆ Remote management of unmanned plants
- ◆ Users profile

Main Features

- ◆ Tolerance control on weighting
 - ◆ Drop control (manually or by self-learning)
 - ◆ Criteria archive (dosage) of extraction and discharge in truck mixer, which can be associated with the mixes
 - ◆ Consistency control
 - ◆ No limit on the number of mixes
 - ◆ Individual plant components control for servicing purposes
 - ◆ Inventory costification
 - ◆ Mix entry Basic
 - ◆ Mix entry "Controlled"
 - ◆ Automatic batching and "Easy" Batch™
-
- ◆ Management of the inventory stock and reordering of products
 - ◆ Production control manages delivery notes and master data; memorizes historical alarms and supplies data of executed charges.
 - ◆ Animated color graphical interface, representing the plant's operations
 - ◆ Diagram management
 - ◆ Customized documents of transport

PLEASE NOTE: MANUAL, SEMI-AUTOMATIC and AUTOMATIC FUNCTIONS by PC keyboard, mouse and video in addition to the control through electrical-mechanical buttons has total control over the executed operations.
